Subject: Fw: Towing Plan for Float Modules
Importance: High

Mike,

I was very happy to see that SV-MV Marie Surveyors (you) had a hand in helping the Pomerleau-Ruskin Team prepare a creditable Tow-Plan (attached) for the now ongoing work at Esquimalt Harbour to which that Plan applies. The original submission made by our contractor needed a great deal of work, and the fact that they took heed of our many observations and in doing so reached out to an "independent" such as yourself who is known (to me) added to the level of comfort that came with their R5 version that was approved by ourselves and DCC for execution.

Thank you for your role in that effort!
